

# Shipping Your Pet from CONUS to Europe

In order to ship a pet from the United States to Europe, there are a few requirements that must be met:

- Rabies Vaccinations older than thirty days, but not older than 12 months.
- Health certificate issued within ten days prior to flying, not earlier than ten days prior to flying. **Your pet will not be shipped without this document.**
- Microchip

Different airlines might impose other regulations in relation to carrier size, heat embargos, and animal weight. Check with the airline carrier you are flying with for specific guidelines.

For more information regarding your pet please go to the following website:

<http://www.healthcare.hqusareur.army.mil/ERV/>

Click on “Animal Medicine” which will take you to Dangerous Dogs, Health Certificates, and Pet Shipment Requirements.
